History:

FALLEN UTOPIA has participated in numerous music events to date, ranging from small bar concerts to large festival gigs. Since its early days, the band has cultivated a strong fanbase, particularly in Carinthia, and has also gained international live experience. In a study conducted by the Pussy Metal Crew, Fallen Utopia was identified as the metal band with the highest number of gigs in Carinthia from 2010 to 2015.

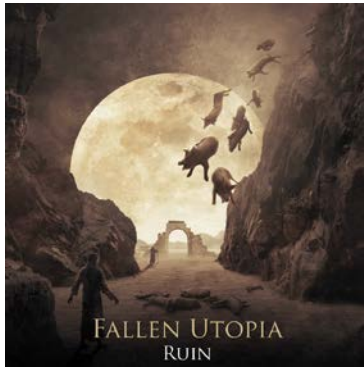

In 2006, the band recorded their first 3-song demo CD at CSW Studio, self-published and sold out, primarily to individuals who were actively engaged in the robust metal scene during that period. A full-length demo LP followed in 2009, once again mixed and mastered at CSW Klagenfurt. A significant milestone for FALLEN UTOPIA came with the release of the EP "Nothing's Made for Eternity" in 2011. This EP was mixed and mastered by Massacre Studio in Styria and marked the band's collaboration with the label Cursed Records. Several years of accumulating live experience, particularly on an international scale, Cursed Records released "Disequilibrium" in December 2017 in Carinthia and subsequently worldwide in January 2018.

In 2019, two new members – Maximilian Wald on bass and Maximilian Ehrlich on drums – completed the new lineup of FALLEN UTOPIA. The eagerly awaited new full-length album "RUIN" is scheduled for release in November 2023, accompanied by four music videos.

Live Performances:

Since 2006, FALLEN UTOPIA has participated in a multitude of concerts, primarily in Austria. They have also supported notable bands such as Fleshgod Apocalypse, Aborted, Misery Index, Pungent Stench, Illdisposed, Debauchery, Hellsaw, and Milking the Goatmachine. Additionally, FALLEN UTOPIA has been featured at various festivals, including Rock the Lake 2009, Extremefest 2012, Metal Mania Open Air 2012, Sick Midsummer 2013, Eine in Teich Festival 2013, Metaldays Festival 2014, Kaltenbach Open Air 2014, Selviytyjät Private Metal Fest 2015, and Feel the Noise Festival 2016.
